RETRO SEDAN – Unity Asset Store Package (ANIMA PROXIMA / Vehicles)

=====

PACKAGE SUMMARY

Stylized low-poly retro sedan with LOD mesh, multiple body/stripe prefab variants, demo scene, materials, and textures. Build-in and URP-ready demo content, and supporting art (mesh, materials, textures).

COUNTS (QUICK REFERENCE)

Prefabs:	33
Materials:	13
Meshes:	1 FBX (RetroSedanMeshLOD.fbx)
Textures:	1 PNG (wall.png)
Scenes:	1 (DemoScene.unity, with baked lighting under Scene/DemoScene/)

WHAT RETROSEDAN CONTAINS

Folder layout under RetroSedan:

Materials/	13 Unity materials (.mat) – vehicle paints, glass, stripes, brake/light helpers, road & wall demo materials, etc.
Meshes/	RetroSedanMeshLOD.fbx – source mesh with LODs for the vehicle.
Prefabs/	33 ready-to-place vehicle prefabs, sorted by base color: Black/ (5) – base black + stripe variants Blue/ (5) – base blue + stripe variants Green/ (5) – base green + stripe variants Red/ (6) – base red + stripe variants White/ (6) – base white + stripe variants Yellow/ (6) – base yellow + stripe variants LOD0, LOD1, LOD2 Box Collider, Rigidbody
Scene/ probes).	DemoScene.unity plus DemoScene/ (lighting data, reflection probes).
Textures/	wall.png – texture used by included materials where assigned.
README.pdf	Publisher documentation (if present in your import).

PREFAB LIST (33)

Black:	01_black, 02_black_whiteStripes, 03_black_blueStripes, 04_black_redStripes, 05_black_yellowStripes
Blue:	01_blue, 02_blue_whiteStripes, 03_blue_blackStripes, 04_blue_redStripes, 05_blue_yellowStripes
Green:	01_green, 02_green_whiteStripes, 03_green_blackStripes, 04_green_redStripes, 05_green_yellowStripes
Red:	01_red, 02_red_whiteStripes, 03_red_blackStripes, 04_red_yellowStripes, 05_red_blueStripes, 06_red_greenStripes

White: 01_white, 02_white_blackStripes, 03_white_redStripes,
04_white_blueStripes, 05_white_greenStripes, 06_white_yellowStripes

Yellow: 01_yellow, 02_yellow_whiteStripes, 03_yellow_blackStripes,
04_yellow_redStripes, 05_yellow_blueStripes, 06_yellow_greenStripes

MATERIALS (13)

01_Blue, 02_Red, 03_Yellow, 04_Green, 04_White, 05_black
Glass_black, Road, Wall1
brake.002, light.003
Material.213, Material.227 (supporting / stripe-related as authored)

USAGE

1. Import into your Unity project.
2. Open Scene/DemoScene.unity for the included demo, or drag any prefab from Prefabs/<Color>/ into your hierarchy.
3. Match render pipeline and lighting to your project (Built-in / URP / HDRP) and convert or replace shaders on materials if needed.

URP Compatibility:

1. Open the Converter: Go to Window > Rendering > Render Pipeline Converter.
2. Select Converter Type: In the top-left dropdown, select Built-in to URP.
3. Select Upgrades: Check the boxes for:
4. Material Upgrade (This is the main step for fixing pink materials).
5. Optional: Rendering Settings (converts lighting/quality settings).
6. Initialize: Click the Initialize Converters button at the bottom right.
- 7.Convert: Review the list of materials found, then click Convert Assets
